INTERNSHIP REPORT

Submitted by

VIDHYA S (7376231MZ155)

of

DEPARTMENT OF MECHATRONICS ENGINEERING

Internship

at

ALLISON TRANSMISSION INDIA PVT. LTD.

BANNARI AMMAN INSTITUTE OF TECHNOLOGY

(An Autonomous Institution affiliated to Anna University, Chennai)

SATHYAMANGALAM – 638 401

ANNA UNIVERSITY: CHENNAI

APRIL - 2026

Allison Transmission

Apr 02, 2026

INTERNSHIP CERTIFICATE

This is to certify that Ms. Vidhya S a student of Mechatronics Engineering from Bannari Amman Institute of Technology, has interned at our organization from 04-Mar-26 to 31-Mar-26.

Wishing her all the best in her future endeavors.

for Allison Transmission India Pvt Ltd.,

Nalini Y
Human Resources

Allison Transmission India Pvt. Ltd.
Registered Office & Plant : A-21, SIPCOT Industrial Park , Oragadam, Sriperumbudur Taulk, Kanchipuram District -620 105 Phone: +91 44 3718 3718 Fax: +91 44 3718 3259 www.allisontransmission.com
CIN - U40101TN2007PTC086532

ACKNOWLEDGEMENT

First, I would like to thank **Mr. John Vasanth, Deputy Director, Operational Excellence and Industrial Engineering of Allison Transmission,** for giving me the opportunity to do an internship within the organization.

I would like to thank **Mr. Rajan Sankaran S, Fabrication Manager** who made this internship very interesting with his constructive ideas, inspirations, encouragement and excellent guidance.

I would like to thank shop floor operators and Engineers for their patience in demonstrating machine operations and sharing practical knowledge.

VIDHYA S

SUPERVISOR EVALUATION OF INTERN

Date: 02.04.2026

Student Name	:	**VIDHYA S**
Name of the Supervisor	:	**MR. RAJAN SANKARAN S**
Designation of Supervisor	:	**FABRICATION MANAGER**
Contact Number of Supervisor	:	**9940970138**
Company / Organisation	:	**ALLISON TRANSMISSION INDIA PVT LTD.**
Address of the Company / Organisation	:	SIPCOT INDUSTRIAL PARK, A-21, ORAGADAM, SRIPERUMBUDUR, TAMIL NADU 631604

Date of Internship From:04-03-2026 To:04-04-2026

Please evaluate your intern by indicating the frequency with which you observed the following behaviours:

Parameters	Excellent	Good	Satisfactory	Needs Improvement
Behaviour's	*			
Performs in a dependable manner	*			
Cooperates with co-workers and supervisors	*			
Shows interest in work	*			
Learns quickly	*			
Shows initiative	*			
Produces high quality work	*			
Accepts responsibility	*			
Accepts criticism	*			
Demonstrates organizational skills		*		
Uses technical knowledge and expertise	*			
Shows good judgment	*			
Demonstrates creativity/originality	*			
Analyzes problems effectively	*			
Is self-reliant		*		
Communicates well	*			
Has a professional attitude	*			
Gives a professional appearance	*			
Is punctual	*			
Uses time effectively	*			

Overall performance of student intern (circle one):	✓ Excellent	Good	Satisfactory	Needs Improvement

Additional comments, if any:

Signature of Industry supervisor

Signature of the HR Manager with seal

INTERNSHIP SYNOPSIS (THIS WILL BE PREPARED IN CONSULTATION WITH FACULTY MENTOR)

Internship Objectives *(Which have been submitted initially before the start of internship)*

Internship Objectives: What do you **intend to learn, acquire and clarify** through this internship? Try to use concrete, measurable terms in listing your learning objectives under each of the following categories:

- Knowledge and Understanding

1. Fabrication process of gears

2.Industrial process Planning

3.Lean Manufacturing

- Skills

1. Standard Operating Procedure

2.Manufacturing Process

3.Industrial Safety

Learning Activities:

On the job: During my internship at Allison Transmission, I learned through observing production processes and participating in TPM (Total Productive Maintenance) award preparation under Autonomous Maintenance. These activities improved my practical knowledge, technical skills, and understanding of industrial operations.

Off the job: I referred to study materials, prepared reports, discussed with peers, and consulted faculty to strengthen my theoretical understanding and relate it to practical work.

Job Description: I worked as a trainee, observing production and maintenance activities, assisting in basic AM tasks and maintaining records. I supported safety practices and documentation work.

Supervision: I worked under the guidance of supervisors and engineers who provided instructions, demonstrations, and feedback. They assisted me in understanding processes, maintenance activities, and project work.

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-1			Date:04.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	On the first day of my internship, I attended an orientation session conducted by the HR and safety department. The session included an overview of the company's operations, products, and organizational structure. A detailed safety induction was conducted where I learned about Personal Protective Equipment (PPE), emergency exits, fire safety systems, and workplace safety rules. The importance of following safety protocols in an industrial environment was strongly emphasized.

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-2			Date:05.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	On the second day, I was introduced to the manufacturing processes involved in transmission systems. I observed safety signboards, hazard zones, and risk indicators across the plant. I learned about accident prevention techniques, proper handling of machinery, and environmental protection practices. The team explained the importance of maintaining a safe and clean work environment to prevent injuries and ensure sustainability.		

Signature of Industry Supervisor

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-3			Date: 06.03.2026
Time of arrival	**8.00AM**	**Time of Departure**	**5.30PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	On this day, I learned about Fugai tagging and Abnormality tagging, which are used to identify and highlight defects or issues in the workplace. I understood that Fugai tagging is used to mark defective parts or quality problems. Abnormality tagging helps in identifying unusual conditions in machines or processes. These tags make it easier to take quick corrective actions. Overall, it helped me understand the importance of visual management in maintaining quality and safety.		

Signature of Industry Supervisor

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-4			Date:09.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	On this day of my internship, I learned about the housing line operations under CNC machines. I observed how the process is used to shape components with high precision. The working of CNC machines and their accuracy in machining were explained clearly. I understood the importance of proper setup and monitoring during operations.		

Signature of Industry Supervisor

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-5			Date:10.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	**Autonomous Maintenance – Inspection & Lubrication** I observed inspection and lubrication tasks performed by machine operators. They checked bolts, belts, and moving parts for proper functioning. Lubrication was done to reduce friction and wear. I understood how AM helps prevent minor issues from becoming major failures.		

Signature of Industry Supervisor

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-6			Date:11.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	On this day of my internship, I learned about the process sequencing involved in manufacturing components like sun gear, ring gear, and pinion. I understood how each step is carried out in a proper order to ensure accuracy and quality. The process was explained, showing how internal shapes and teeth are formed precisely. I observed how different operations are connected to complete the final product. Overall, it was a valuable learning experience about machining processes and sequencing.		

Signature of Industry Supervisor

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-7			Date:12.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	On this day of my internship, I learned about Six Sigma concepts, which focus on improving process quality by reducing defects and variations. I understood the DMAIC methodology (Define, Measure, Analyze, Improve, Control) used for problem-solving. I also learned how Six Sigma helps in identifying root causes of errors in a process. Real-time examples were discussed to understand its industrial applications. This learning helped me realize the importance of continuous improvement in any organization.		

Signature of Industry Supervisor

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-8			Date:13.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	On this day, I learned about the vertical tool store and how tools are neatly arranged for easy access and space saving. I observed how tools are issued and returned with proper tracking. I also understood the importance of maintaining the CLRI sheet for recording daily activities and observations. It helped me see how documentation ensures accuracy and accountability.		

Signature of Industry Supervisor

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-9			Date:13.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	**5S Implementation** I observed the implementation of 5S methodology on the shop floor. Tools and materials were organized systematically. Cleanliness and discipline were maintained to improve efficiency and safety.		

Signature of Industry Supervisor

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-10			Date:16.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	On this day, I learned about important gear manufacturing processes such as hobbing, shaping, shaving, broaching, and nitriding. I understood that hobbing and shaping are used to create gear teeth, while shaving is done to improve surface finish. Broaching helps in producing accurate internal shapes. Nitriding is a heat treatment process used to increase hardness and wear resistance. Overall, it gave me a clear understanding of different processes involved in gear production.

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-11			Date:17.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	**Breakdown Analysis** I learned how breakdowns are analyzed using root cause analysis techniques like 5 Why and Fishbone diagram. Engineers identified causes and implemented corrective actions.		

Signature of Industry Supervisor

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-12			Date:18.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	**Lubrication and Preventive Maintenance** I observed lubrication schedules and preventive maintenance activities. Proper lubrication reduces wear and increases machine life. Maintenance schedules were strictly followed.

STUDENT'S DAILY DIARY/ DAILY LOG

DAY-13			Date:19.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	On this day of my internship, I learned about PM (Preventive Maintenance) activities in the industry. I understood how regular inspection, cleaning, lubrication, and tightening help in maintaining machine efficiency. The importance of scheduling maintenance to avoid breakdowns was explained. I observed how proper PM activities improve equipment life and reduce downtime.

Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	**One Point Lesson** I learned about One Point Lesson (OPL) and its importance in sharing simple and clear knowledge in the workplace. I understood that OPL is used to explain a single concept or task in an easy and visual way. It helps workers quickly understand and remember important points. The session showed how OPL improves communication and reduces mistakes.

DAY-21			Date:31.03.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	I learned how maintenance schedules are planned and executed. Proper scheduling prevents machine failure. , I learned about G-code and M-code, which are used in CNC machines for controlling operations. I understood that G-codes are used for controlling movements like cutting, positioning, and speed. M-codes are used for machine functions such as starting or stopping the spindle and coolant. I observed how these codes work together to perform machining operations accurately. It helped me understand the basics of CNC programming. Overall, it was a useful introduction to machine control codes.

DAY-22			Date:01.04.2026
Time of arrival	**8.00 AM**	**Time of Departure**	**5.30 PM**
Dept./Division	**MAINTENANCE**	**Name of finished Product**	**NIL**
Name of HOD/ Supervisor With e-mail id	Rajan Sankaran S (S.Rajan@allisontransmission.com)		
Summary of the day	I interacted with workers and supervisors to understand real-time challenges and solutions in production I learned about the assembly line process, where different parts are assembled step by step in a sequence. I observed how each worker performs a specific task to complete the final product efficiently. The importance of coordination and time management in the assembly line was explained. It helps in increasing productivity and reducing errors. Overall, it gave me a clear understanding of systematic production flow. I compiled all observations and prepared my internship report. Data collected during the internship was analyzed.

3	Reflection of Internship (Objective to be mapped)	34
4	Usefulness of the Internship in the Course	35
5	Conclusion	35

1.Description of Internship

The internship at Allison Transmission provided valuable exposure to industrial operations and manufacturing processes. The main objective of the internship was to understand real-time working conditions in an industry and to apply theoretical knowledge in a practical environment.

During the internship, I observed various departments such as production, maintenance, and safety (SHE). I gained basic knowledge about transmission assembly, machine operations, and maintenance practices like Autonomous Maintenance (AM) and Planned Maintenance (PM).

Overall, the internship helped me improve my technical understanding, practical skills, and awareness of industrial safety and teamwork.

2.The organization of the company

Allison Transmission is a globally recognized company specializing in automatic transmissions for medium and heavy-duty vehicles. The company operates in multiple countries and serves industries such as defence, construction, public transportation, and logistics.

Key Features:

- Established leader in automatic transmission systems
- Strong focus on innovation and research
- High-quality manufacturing standards
- Emphasis on sustainability and environmental responsibility

Organizational Structure:

The company follows a structured hierarchy:

- Top Management (Directors & Executives)
- Department Heads (Production, Quality, Maintenance)
- Supervisors and Engineers
- Technicians and Operators

Departments Observed:

- Production Department – Assembly and machining of transmission components
- Maintenance Department – Machine upkeep and breakdown prevention
- Quality Control – Inspection and testing
- SHE Department – Safety and environmental compliance

The organization promotes teamwork, efficiency, and continuous improvement.

2.1 Internship Activities

During my internship at Allison Transmission, I was involved in various activities that provided practical exposure to industrial operations, maintenance practices, and safety procedures. The daily activities were a combination of observation, participation, and learning under the guidance of supervisors and engineers.

Each day typically began with a morning briefing session, where tasks were assigned and safety instructions were discussed. This helped in understanding the workflow and planning daily activities effectively.

1. Production-Related Activities

Observed the assembly process of transmission components, including handling and fitting of parts

- Learned about workflow sequencing and importance of precision in manufacturing
- Understood basic machine operations used in production lines
- Noted quality checks performed during different stages of assembly

2. Maintenance Activities (AM & PM)

Participated in Autonomous Maintenance (AM) activities such as:

- Cleaning of machines
- Visual inspection for leaks and wear
- Lubrication of moving parts
- Tightening of loose components
- Observed Planned Maintenance (PM) activities:
- Scheduled inspection of machines
- Replacement of worn-out parts
- Preventive measures to avoid breakdowns

- Maintenance record documentation

These activities helped in understanding how industries ensure machine reliability and efficiency.

3. SHE (Safety, Health, and Environment) Activities

- Learned about workplace safety rules and regulations
- Used Personal Protective Equipment (PPE) such as gloves, helmets, and safety shoes
- Identified potential hazards in the work area
- Observed emergency procedures and safety drills
- Understood environmental policies followed in the industry

4. Documentation and Observation

- Maintained daily activity records
- Noted machine performance and maintenance schedules
- Interacted with technicians and engineers to understand practical challenges
- Observed teamwork and coordination among departments
- Overall Learning from Daily Activities
- Practical understanding of industrial processes
- Importance of maintenance in preventing failures
- Awareness of safety and environmental practices
- Improvement in observation, teamwork, and communication skill

1. Reflection of Internship

The internship successfully met its objectives.

Skills Developed:

- Practical understanding of industrial systems
- Maintenance techniques (AM & PM)
- Problem-solving ability
- Teamwork and communication

Key Learnings:

- Importance of safety in industries
- Role of preventive maintenance

- Sustainability practices

This experience improved my confidence and technical knowledge.

2. Usefulness of the Internship in the Course

The internship was highly relevant to my Mechatronics Engineering course.

Applications:

- The knowledge gained can be applied in **manufacturing industries** for improving production efficiency.
- It helps in implementing **maintenance and quality control techniques** like TPM and Six Sigma.
- The skills learned can be used in **CNC machining and industrial operations** for better performance and accuracy.

Benefits:

- Improved practical understanding
- Exposure to real-world challenges
- Better career clarity

3. Conclusion

The internship at Allison Transmission was a valuable learning experience. It provided exposure to industrial operations, maintenance systems, and sustainable practices.
I learned about various processes such as CNC operations, TPM activities, maintenance practices, and quality improvement techniques like Six Sigma. It helped me understand how theoretical concepts are applied in real working environments. I also improved my technical skills, observation ability, and teamwork. Overall, this internship was a great learning experience that will support my future career growth.
